The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) Stephen P. Hubbell

Despite its supreme importance and the threat of its global crash, biodiversity remains poorly understood both empirically and theoretically. This ambitious book presents a new, general neutral theory to explain the origin, maintenance, and loss of biodiversity in a biogeographic context.

Until now biogeography (the study of the geographic distribution of species) and biodiversity (the study of species richness and relative species abundance) have had largely disjunct intellectual histories. In this book, Stephen Hubbell develops a formal mathematical theory that unifies these two fields. When a speciation process is incorporated into Robert H. MacArthur and Edward O. Wilson's now classical theory of island biogeography, the generalized theory predicts the existence of a universal, dimensionless biodiversity number. In the theory, this fundamental biodiversity number, together with the migration or dispersal rate, completely determines the steady-state distribution of species richness and relative species abundance on local to large geographic spatial scales and short-term to evolutionary time scales.

Although neutral, Hubbell's theory is nevertheless able to generate many nonobvious, testable, and remarkably accurate quantitative predictions about biodiversity and biogeography. In many ways Hubbell's theory is the ecological analog to the neutral theory of genetic drift in genetics. The unified neutral theory of biogeography and biodiversity should stimulate research in new theoretical and empirical directions by ecologists, evolutionary biologists, and biogeographers.

From reader reviews:

Tanisha Goss:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each book has different aim or goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They are reading whatever they take because their hobby is definitely reading a book. Why not the person who don't like reading a book? Sometime, individual feel need book once they found difficult problem or perhaps exercise. Well, probably you will require this The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology).

Brandon Macdonald:

The book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) can give more knowledge and also the precise product information about everything you want. Why then must we leave a good thing like a book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology)? A few of you have a different opinion about e-book. But one aim which book can give many facts for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or data that you take for that, it is possible to give for each other; you could share all of these. Book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open and read a guide. So it is very wonderful.

Jeffrey Baptiste:

Reading a reserve can be one of a lot of pastime that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new facts. When you read a book you will get new information simply because book is one of various ways to share the information as well as their idea. Second, looking at a book will make you more imaginative. When you studying a book especially fiction book the author will bring someone to imagine the story how the people do it anything. Third, you can share your knowledge to other individuals. When you read this The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology), you are able to tells your family, friends and soon about yours guide. Your knowledge can inspire others, make them reading a publication.

Thomas Manna:

Many people spending their period by playing outside with friends, fun activity having family or just watching TV all day long. You can have new activity to enjoy your whole day by examining a book. Ugh, do you consider reading a book really can hard because you have to use the book everywhere? It alright you can have the e-book, getting everywhere you want in your Mobile phone. Like The Unified Neutral Theory of

Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) which is obtaining the e-book version. So , why not try out this book? Let's observe.
