Here, for the first time, is a complete history of the world based on the beliefs and writings of secret societies, researched with the help of an initiate of more than one secret society.

From the occult roots of science to the esoteric motives behind American foreign policy, this fascinating history shows that the basic facts of human existence on this planet can be viewed from many very different angles. And once our viewpoint has been altered, we will see that secret philosophies are encoded everywhere around us - in great art and literature, in the arrangement of the pips in an apple, in the names of the days of the week, even in the very stories we tell our children.
