Auditory Trauma, Protection, and Repair: 31 (Springer Handbook of Auditory Research)

Jochen Schacht, Richard R. Fay

Auditory Trauma, Protection, and Repair: 31 (Springer Handbook of Auditory Research) Jochen Schacht, Richard R. Fay

The past decade has brought great advances in our understanding of the mechanisms underlying auditory pathologies. Molecular biology and genetics have primarily contributed to this enhanced understanding, which in turn has driven the design of novel rational therapeutic interventions. This volume presents recent developments in research and their potential translation to the clinical setting. The volume addresses the major entities of peripheral auditory trauma, discusses the underlying mechanisms, the central nervous system consequences, protective interventions and finally explores the possibilities to restore cochlear morphology and function.
