## Chapter 004, Intermolecular Interactions Serban Moldoveanu

NOTE: This is a single chapter excerpted from the book *Essentials in Modern HPLC Separations*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

*Essentials in Modern HPLC Separations* discusses the role of separation in high performance liquid chromatography (HPLC). This up-to-date reference systematically covers new developments in types and characteristics of stationary phases, mobile phases, and other factors of this technique that influence separation of compounds being analyzed. The volume also considers the selection process for stationary and mobile phases in relation to the molecules being separated and examined, as well as their matrices.

The book includes a section on the contemporary applications of HPLC, particularly the analysis of pharmaceutical and biological samples, food and beverages, environmental samples, and more.

- Discusses key parameters in HPLC separation
- Describes interrelation between various HPLC features (solvent pressure, separation, detection)
- Includes a large number of references
