A la hora de enfrentarse a la seguridad, la principal dificultad radica en la dispersión de la información disponible, por lo que en este libro de seguridad y gestión de los laboratorios hemos tomado como punto de partida la experiencia de nuestro trabajo docente para ofrecer unos principios generales sobre diseño, organización e instalaciones en los laboratorios, seguridad y prevención de riesgos, manipulación de sustancias químicas y eliminación de residuos, que orientan de forma clara a la hora de lograr una gestión adecuada de un laboratorio. Además, los contenidos están actualizados conforme a la normativa europea vigente y transpuesta al ordenamiento jurídico español.

José Antonio Palenzuela López es catedrático y *Carmen M.^a Rodríguez Pérez, José Luis Ravelo Socas y José M.^a Palazón* son profesores titulares del Departamento de Química Orgánica de la Universidad de La Laguna.
