The Science of Learning

Joseph J. Pear

The Science of Learning Joseph J. Pear

For over a century and a quarter, the science of learning has expanded at an increasing rate and has achieved the status of a mature science. It has developed powerful methodologies and applications. The rise of this science has been so swift that other learning texts often overlook the fact that, like other mature sciences, the science of learning has developed a large body of knowledge. *The Science of Learning* comprehensively covers this knowledge in a readable and highly systematic manner. Methodology and application are discussed when relevant; however, these aspects are better appreciated after the reader has a firm grasp of the scientific knowledge of learning processes. Accordingly, the book begins with the most fundamental and well-established principles of the science and builds on the preceding material toward greater complexity. The connections of the material with other sciences, especially its sister science, biology, are referenced throughout. Through these frequent references to biology and evolution, the book keeps in the forefront the recognition that the principles of learning apply to all animals. Thus, in the final section the book brings together all learning principles studied in research settings by demonstrating their relevance to both animals and humans in their natural settings. For animals this is the untamed environment of their niches; for humans it is any social environment, for *Homo sapiens* is the social and learning animal par excellence.

From reader reviews:

James Lapham:

The book The Science of Learning can give more knowledge and also the precise product information about everything you want. So why must we leave the best thing like a book The Science of Learning? Several of you have a different opinion about publication. But one aim in which book can give many information for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or details that you take for that, you are able to give for each other; you could share all of these. Book The Science of Learning has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open up and read a reserve. So it is very wonderful.

Fabiola Stewart:

Information is provisions for those to get better life, information currently can get by anyone on everywhere. The information can be a information or any news even an issue. What people must be consider any time those information which is inside the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one the particular resource are convinced. If you receive the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take The Science of Learning as the daily resource information.

Lily McDermott:

Reading a publication can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new information. When you read a book you will get new information because book is one of a number of ways to share the information or even their idea. Second, reading a book will make you more imaginative. When you reading through a book especially tale fantasy book the author will bring you to definitely imagine the story how the people do it anything. Third, you are able to share your knowledge to other individuals. When you read this The Science of Learning, you could tells your family, friends and soon about yours publication. Your knowledge can inspire the mediocre, make them reading a guide.

Robert Hansen:

This The Science of Learning is completely new way for you who has interest to look for some information as it relief your hunger of information. Getting deeper you on it getting knowledge more you know or perhaps you who still having small amount of digest in reading this The Science of Learning can be the light food for you because the information inside this book is easy to get simply by anyone. These books create itself in the form and that is reachable by anyone, sure I mean in the e-book application form. People who think that in guide form make them feel sleepy even dizzy this publication is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for a person. So , don't miss that! Just read this e-book type for your better life and knowledge.
