Automotive Ergonomics: Driver-Vehicle Interaction

Automotive Ergonomics: Driver-Vehicle Interaction

In the last 20 years, technological developments have set new standards in driver-vehicle interaction. These developments effect the entire lifecycle, from the moment a customer enters a dealership to examine a prospective vehicle, to the driving experience during the vehicle lifecycle, and the interaction with other road users and facilities in place. It is such developments, socioeconomic on the one hand, technological on the other, that make **Automotive Ergonomics: Driver-Vehicle Interaction** an important addition to the literature in this field.

The book explores the challenges in research and development of new vehicles brought about by recent advances in theory and practice. Highlighting topics such as Human-Machine Interaction, Advanced Driver Assistance Systems, and the hugely evolving subject of digital human modeling and simulation in automotive applications, the book covers:

- Best practices and emerging developments
- Advances in power train technology
- Ergonomics of electric vehicles
- Effects of driver distraction, workload, and physical environments
- Active safety systems
- Navigation support
- Vibration and noise perception
- Health and safety aspects of driving

While this area is not new, most of the books available are either too general or out of date. This book presents the latest developments in the field of ergonomics and human factors and discusses their implications to the design of modern and future vehicles, giving you the tools you need for innovation.

From reader reviews:

Leona Ferretti:

Reading a e-book can be one of a lot of task that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new data. When you read a publication you will get new information because book is one of many ways to share the information as well as their idea. Second, studying a book will make you actually more imaginative. When you looking at a book especially fiction book the author will bring one to imagine the story how the figures do it anything. Third, you could share your knowledge to other folks. When you read this Automotive Ergonomics: Driver-Vehicle Interaction, you could tells your family, friends and soon about yours guide. Your knowledge can inspire different ones, make them reading a e-book.

Donna Bohannon:

Reading a reserve tends to be new life style in this particular era globalization. With reading through you can get a lot of information that could give you benefit in your life. Using book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or their experience. Not only the storyplot that share in the guides. But also they write about the ability about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on earth always try to improve their skill in writing, they also doing some research before they write to the book. One of them is this Automotive Ergonomics: Driver-Vehicle Interaction.

Christopher Walker:

This Automotive Ergonomics: Driver-Vehicle Interaction is new way for you who has interest to look for some information since it relief your hunger of information. Getting deeper you on it getting knowledge more you know or else you who still having little digest in reading this Automotive Ergonomics: Driver-Vehicle Interaction can be the light food to suit your needs because the information inside this kind of book is easy to get through anyone. These books acquire itself in the form which can be reachable by anyone, yeah I mean in the e-book web form. People who think that in guide form make them feel sleepy even dizzy this book is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book variety for your better life and knowledge.

Cheryl Edgerly:

As a pupil exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's internal or real their interest. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know

that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Automotive Ergonomics: Driver-Vehicle Interaction can make you truly feel more interested to read.
