## Knowledge-Based Information Retrieval and Filtering from the Web (The Springer International Series in Engineering and Computer Science)

**Knowledge-Based Information Retrieval and Filtering from the Web** contains fifteen chapters, contributed by leading international researchers, addressing the matter of information retrieval, filtering and management of the information on the Internet. The research presented deals with the need to find proper solutions for the description of the information found on the Internet, the description of the information consumers need, the algorithms for retrieving documents (and indirectly, the information embedded in them), and the presentation of the information found. The chapters include:

- Ontological representation of knowledge on the WWW;
- Information extraction;
- Information retrieval and administration of distributed documents;
- Hard and soft modeling based knowledge capture;
- Summarization of texts found on the WWW;
- User profiles and personalization for web-based information retrieval system;
- Information retrieval under constricted bandwidth;
- Multilingual WWW;
- Generic hierarchical classification using the single-link clustering;
- Clustering of documents on the basis of text fuzzy similarity;
- Intelligent agents for document categorization and adaptive filtering;
- Multimedia retrieval and data mining for E-commerce and E-business;
- A Web-based approach to competitive intelligence;
- Learning ontologies for domain-specific information retrieval;
- An open, decentralized architecture for searching for, and publishing information in distributed systems.

### **From reader reviews:**

#### **Billy Anderson:**

Hey guys, do you would like to finds a new book you just read? May be the book with the subject Knowledge-Based Information Retrieval and Filtering from the Web (The Springer International Series in Engineering and Computer Science) suitable to you? Often the book was written by well-known writer in this era. The book untitled Knowledge-Based Information Retrieval and Filtering from the Web (The Springer International Series in Engineering and Computer Science)is the one of several books that will everyone read now. This kind of book was inspired a lot of people in the world. When you read this e-book you will enter the new dimensions that you ever know ahead of. The author explained their strategy in the simple way, and so all of people can easily to be aware of the core of this e-book. This book will give you a large amount of information about this world now. To help you to see the represented of the world within this book.

#### **Pam Boyd:**

In this period globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The particular book that recommended to you is Knowledge-Based Information Retrieval and Filtering from the Web (The Springer International Series in Engineering and Computer Science) this guide consist a lot of the information of the condition of this world now. This specific book was represented so why is the world has grown up. The words styles that writer use to explain it is easy to understand. The writer made some research when he makes this book. Honestly, that is why this book suited all of you.

#### **Paul Herbert:**

As a student exactly feel bored to be able to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's internal or real their passion. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Knowledge-Based Information Retrieval and Filtering from the Web (The Springer International Series in Engineering and Computer Science) can make you sense more interested to read.

#### **Julie Bailey:**

What is your hobby? Have you heard which question when you got students? We believe that that question

was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. So you know that little person like reading or as looking at become their hobby. You have to know that reading is very important and book as to be the issue. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. Different categories of books that can you go onto be your object. One of them is this Knowledge-Based Information Retrieval and Filtering from the Web (The Springer International Series in Engineering and Computer Science).
