Theories of the Information Society (International Library of Sociology) Professor Frank Webster, Frank Webster

Information has come to be regarded as a symbol of the age in which we live. Talk nowadays is of an `information technology' revolution, even of an `information society'. But just what does this mean? In *Theories of the Information Society* Frank Webster sets out to make sense of the information explosion. He examines and assesses a variety of `images of the information society', and takes a sceptical look at what thinkers mean when they do refer to an `information society'. He looks closely at different approaches to informational developments, and provides critical commentaries on all the major post-war theories.
