Sensing Technologies For Precision Irrigation (SpringerBriefs in Electrical and Computer Engineering) Dubravko ?ulibrk, Dejan Vukobratovic, Vladan Minic, Marta Alonso Fernandez, Javier Alvarez Osuna, Vladimir Crnojevic

This brief provides an overview of state-of-the-art sensing technologies relevant to the problem of precision irrigation, an emerging field within the domain of precision agriculture. Applications of wireless sensor networks, satellite data and geographic information systems in the domain are covered. This brief presents the basic concepts of the technologies and emphasizes the practical aspects that enable the implementation of intelligent irrigation systems. The authors target a broad audience interested in this theme and organize the content in five chapters, each concerned with a specific technology needed to address the problem of optimal crop irrigation. Professionals and researchers will find the text a thorough survey with practical applications.

From reader reviews:

Keith Smith:

Have you spare time for just a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a move, shopping, or went to typically the Mall. How about open or read a book titled Sensing Technologies For Precision Irrigation (SpringerBriefs in Electrical and Computer Engineering)? Maybe it is being best activity for you. You realize beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with their opinion or you have other opinion?

Paula Mayo:

What do you regarding book? It is not important along? Or just adding material when you really need something to explain what the ones you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They need to answer that question simply because just their can do that. It said that about guide. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need that Sensing Technologies For Precision Irrigation (SpringerBriefs in Electrical and Computer Engineering) to read.

John Casper:

People live in this new day of lifestyle always try to and must have the free time or they will get lot of stress from both lifestyle and work. So , once we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we consult again, what kind of activity do you have when the spare time coming to you actually of course your answer can unlimited right. Then do you try this one, reading publications. It can be your alternative in spending your spare time, often the book you have read is actually Sensing Technologies For Precision Irrigation (SpringerBriefs in Electrical and Computer Engineering).

Gary Carter:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's internal or real their hobby. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that looking at is not important, boring along with can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Sensing Technologies For Precision Irrigation (SpringerBriefs in Electrical and Computer Engineering) can make you really feel more interested to read.
