Modern warfare has a new form. The days of international combat are fading. So how do major world powers maintain control over their people today?

War Against the People is a disturbing insight into the new ways world powers such as the US, Israel, Britain and China forge war today. It is a subliminal war of surveillance and whitewashed terror, conducted through new, high-tech military apparatuses, designed and first used in Israel against the Palestinian population. Including hidden camera systems, sophisticated sensors, information databases on civilian activity, automated targeting systems and, in some cases, unmanned drones, it is used to control the very people the nation's leaders profess to serve.

Drawing from years of research, as well as investigations and interviews conducted at international arms fairs, Jeff Halper reveals that this practice is much more insidious than was previously thought. As Western governments tighten the grip on their use of private information and claw back individual liberties, *War Against the People* is a timely reminder that fundamental human rights are being compromised for vast sections of the world, and that this is a subject that should concern everyone.
