Natural Antioxidants and Biocides from Wild Medicinal Plants

Natural Antioxidants and Biocides from Wild Medicinal Plants

Plants produce secondary metabolites with herbicidal, insecticidal, fungicidal and antioxidant activities. These metabolites offer alternatives for the control of pests and diseases, and in some cases directly contribute to improve food quality.

This book provides an up-to-date treatment of antioxidant and biocidal compounds mainly from Latin American plants. New antimicrobials, insecticidal, and antioxidants are compiled in a single source for the first time based on the research and knowledge of several internationally renowned research groups. The book is organized in three sections: Section One provides a general overview and perspectives on antioxidant, medicinal and biocidal plant compounds. Section Two provides information on plant antioxidants isolated from a wide range of species. Section Three provides insecticidal, antimicrobial and other biocidal activities based on peptides, phytoecdysteroids, alkaloids, polyphenols, terpenoids and other allelochemicals. This book will be a helpful reference for students, researchers and teachers interested in allelochemistry as well as the antioxidant and medicinal properties of Latin American Plants.

From reader reviews:

James Crow:

Information is provisions for individuals to get better life, information currently can get by anyone on everywhere. The information can be a information or any news even a huge concern. What people must be consider while those information which is within the former life are challenging be find than now is taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you receive the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Natural Antioxidants and Biocides from Wild Medicinal Plants as your daily resource information.

Eric Chabot:

Exactly why? Because this Natural Antioxidants and Biocides from Wild Medicinal Plants is an unordinary book that the inside of the book waiting for you to snap the item but latter it will surprise you with the secret the item inside. Reading this book adjacent to it was fantastic author who all write the book in such amazing way makes the content within easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This unique book will give you a lot of positive aspects than the other book get such as help improving your proficiency and your critical thinking approach. So , still want to delay having that book? If I ended up you I will go to the e-book store hurriedly.

Gary Flint:

Is it anyone who having spare time then spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Natural Antioxidants and Biocides from Wild Medicinal Plants can be the reply, oh how comes? The new book you know. You are thus out of date, spending your time by reading in this completely new era is common not a geek activity. So what these publications have than the others?

Lena Lewis:

What is your hobby? Have you heard which question when you got learners? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you know that little person such as reading or as looking at become their hobby. You need to know that reading is very important in addition to book as to be the point. Book is important thing to provide you knowledge, except your teacher or lecturer. You get good news or update about something by book. Different categories of books that can you decide to try be your object. One of them are these claims Natural Antioxidants and Biocides from Wild Medicinal Plants.
