The Human Fossil Record, Brain Endocasts: The Paleoneurological Evidence, Volume 3 Ralph L.

Holloway, Douglas C. Broadfield, Michael S. Yuan, Jeffrey H. Schwartz, Ian Tattersall

Brain Endocasts is the only comprehensive, single-volume work dealing exclusively and uniformly with fossil hominid brain endocasts. Never-before-published photographs come together with easily accessible, coherent descriptions to create a detailed reference on the paleoneurological evidence for human evolution. Each entry offers essential information related to the location, dating, associations, and morphology of a given endocast. The text also covers the latest methodologies and techniques available for studying endocasts. In addition, a concise summary shows how these fossil records contribute to our understanding of human evolution and behavior.
