Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry)

Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry)

This is the third volume of a sub-series entitled Evaluation of Analytical Methods in Biological Systems. (The first two were Analysis of Biogenic Amines edited by G.B. Baker and R.T. Coutts, and Hazardous Metals in Human Toxicology edited by A. Vercruysse).

This latest volume addresses beta-blockers - an area of research for which a Nobel Prize in Medicine was awarded in 1988. It provides an up-to-date and comprehensive coverage of the theory and practice of the determination of beta-blockers in biological material. Two main fields of research are dealt with in this book: analytical chemistry and pharmacology, and, as it deals with drugs used in clinical practice, it is also related to a third area: therapy. Thus, it offers relevant information to workers in all three fields.

Some 50 beta-blockers are discussed, and nine methods of analysis. The methods are divided into three groups: optical, chromatographic, and saturation methods. In addition to the analytical methods themselves, sample handling problems are also discussed in detail, as is the information content of the analytical results obtained. Special chapters are directed towards those working in pharmacology and pharmacokinetics. Finally, as recent evidence points to the increased importance of distinguishing optical isomers of drugs, a chapter on the determination of optical isomers of beta-blockers in biological material is also included. An extensive subject index and two supplements giving retention indices and structures of beta-blockers complete the book.

This is the first book to treat beta-blockers from the point of view of their determination and to discuss in detail the use of analytical methods for beta-blockers. It will thus appeal to a wide-ranging readership.

From reader reviews:

Jose Banks:

Can you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Aim to pick one book that you never know the inside because don't ascertain book by its cover may doesn't work the following is difficult job because you are afraid that the inside maybe not since fantastic as in the outside seem likes. Maybe you answer may be Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) why because the great cover that make you consider in regards to the content will not disappoint you actually. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly direct you to pick up this book.

Ralph McClure:

Beside this Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) in your phone, it might give you a way to get more close to the new knowledge or details. The information and the knowledge you are going to got here is fresh from your oven so don't end up being worry if you feel like an aged people live in narrow small town. It is good thing to have Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) because this book offers to you readable information. Do you often have book but you seldom get what it's interesting features of. Oh come on, that won't happen if you have this within your hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss the idea? Find this book as well as read it from at this point!

Pierre Winter:

In this particular era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple solution to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. Among the books in the top checklist in your reading list is definitely Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry). This book that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking up and review this guide you can get many advantages.

Kelly Spinney:

What is your hobby? Have you heard in which question when you got pupils? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And also you know that little person like reading or as reading become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to include you knowledge, except your

own teacher or lecturer. You will find good news or update in relation to something by book. Different categories of books that can you take to be your object. One of them is niagra Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry).
