## **Biochemistry for Sport and Exercise Metabolism** Donald MacLaren, James Morton

How do our muscles produce energy for exercise and what are the underlying biochemical principles involved? These are questions that students need to be able to answer when studying for a number of sport related degrees. This can prove to be a difficult task for those with a relatively limited scientific background. *Biochemistry for Sport and Exercise Metabolism* addresses this problem by placing the primary emphasis on sport, and describing the relevant biochemistry within this context.

The book opens with some basic information on the subject, including an overview of energy metabolism, some key aspects of skeletal muscle structure and function, and some simple biochemical concepts. It continues by looking at the three macromolecules which provide energy and structure to skeletal muscle - carbohydrates, lipids, and protein. The last section moves beyond biochemistry to examine key aspects of metabolism - the regulation of energy production and storage. Beginning with a chapter on basic principles of regulation of metabolism it continues by exploring how metabolism is influenced during high-intensity, prolonged, and intermittent exercise by intensity, duration, and nutrition.

### Key Features:

- A clearly written, well presented introduction to the biochemistry of muscle metabolism.
- Focuses on sport to describe the relevant biochemistry within this context.
- In full colour throughout, it includes numerous illustrations, together with learning objectives and key points to reinforce learning.

*Biochemistry for Sport and Exercise Metabolism* will prove invaluable to students across a range of sport-related courses, who need to get to grips with how exercise mode, intensity, duration, training status and nutritional status can all affect the regulation of energy producing pathways and, more important, apply this understanding to develop training and nutrition programmes to maximise athletic performance.

### **From reader reviews:**

#### **Joaquin Hogan:**

Book is to be different for each and every grade. Book for children until finally adult are different content. To be sure that book is very important usually. The book Biochemistry for Sport and Exercise Metabolism seemed to be making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The guide Biochemistry for Sport and Exercise Metabolism is not only giving you a lot more new information but also to be your friend when you truly feel bored. You can spend your current spend time to read your e-book. Try to make relationship with the book Biochemistry for Sport and Exercise Metabolism. You never feel lose out for everything in the event you read some books.

#### **Kirby Paradiso:**

Your reading 6th sense will not betray anyone, why because this Biochemistry for Sport and Exercise Metabolism e-book written by well-known writer who knows well how to make book that could be understand by anyone who also read the book. Written with good manner for you, still dripping wet every ideas and creating skill only for eliminate your hunger then you still doubt Biochemistry for Sport and Exercise Metabolism as good book not only by the cover but also through the content. This is one book that can break don't ascertain book by its deal with, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your reading through sixth sense already said so why you have to listening to one more sixth sense.

#### **Angeline Allison:**

Reading a book to be new life style in this yr; every people loves to read a book. When you go through a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this sort of us novel, comics, in addition to soon. The Biochemistry for Sport and Exercise Metabolism provide you with new experience in reading a book.

#### **Brian Robinson:**

Many people said that they feel weary when they reading a guide. They are directly felt this when they get a half elements of the book. You can choose the book Biochemistry for Sport and Exercise Metabolism to make your current reading is interesting. Your skill of reading proficiency is developing when you like reading. Try to choose very simple book to make you enjoy to learn it and mingle the sensation about book and looking at especially. It is to be 1st opinion for you to like to start a book and go through it. Beside that the publication Biochemistry for Sport and Exercise Metabolism can to be your new friend when you're really feel alone and confuse with the information must you're doing of this time.
